Prayer Service
Laudato Si/Care for Creation

Materials:
• Paper and Pencils
• Cross
• Copies of Excerpts From Laudato Si and Closing Prayer handouts for each participant.

Process:
Invite participants into a prayerful mindset and distribute Excerpts From Laudato Si handout.

Leader:
One of the principles of Catholic social teaching is Care for Creation.
We show our respect for the Creator by our stewardship of creation.
We are called to protect people and the planet, living our faith in relationship with all of God’s creation.
We are committed to actions of advocacy in our lives that fulfill this responsibility.
Prayer can make us more conscious of this call, and can form us to follow Jesus’ example to respond freely out of love.

Instruct participants to read the Excerpts From Laudato Si and choose one excerpt or phrase that speaks to them. They should then compose a prayer for advocacy for our world and/or our global neighbors based on the excerpt. When participants have composed their prayers, instruct them to sit in a circle. Hold up the cross for all to see.
Leader:

We gather here in the name of the Father, and of the Son and of the Holy Spirit. Amen.

God, who gives us the gift of creation, we gather here as many, made one.

We ask that you help us to hear Your call, so that we may discern how we can use the gifts You have given each and every one of us to be advocates for our earth and for those who live in poverty throughout the world today.

Hear our prayers, fill our hearts, make us one in you.

Pass the cross around the room and allow each person to read his or her prayer while holding the cross aloft.

The cross is passed around the circle until all prayers are prayed and the cross returns to the leader.

Laudato Si/Care for Creation

Excerpts from Laudato Si

Pope Francis, 2015

The human environment and the natural environment deteriorate together; we cannot adequately combat environmental degradation unless we attend to causes related to human and social degradation. In fact, the deterioration of the environment and of society affects the most vulnerable people on the planet...

The impact of present imbalances is also seen in the premature death of many of the poor…. (48)

We have to realize that a true ecological approach always becomes a social approach; it must integrate questions of justice in debates on the environment, so as to hear both the cry of the earth and the cry of the poor. (49)

Climate change is a global problem with grave implications: environmental, social, economic, political and for the distribution of goods. It represents one of the principal challenges facing humanity in our day. Its worst impact will probably be felt by developing countries in coming decades. Many of the poor live in areas particularly affected by phenomena related to warming, and their means of subsistence are largely dependent on natural reserves and ecosystemic services such as agriculture, fishing and forestry. They have no other financial activities or resources which can enable them to adapt to climate change or to face natural disasters, and their access to social services and protection is very limited. For example, changes in climate, to which animals and plants cannot adapt, lead them to migrate; this in turn affects the livelihood of the poor, who are then forced to leave their homes, with great uncertainty for their future and that of their children. There has been a tragic rise in the number of migrants seeking to flee from the growing poverty caused by environmental degradation. They are not recognized
by international conventions as refugees; they bear the loss of the lives they have left behind, without enjoying any legal protection whatsoever. (25)

Sadly, there is widespread indifference to such suffering, which is even now taking place throughout our world. Our lack of response to these tragedies involving our brothers and sisters points to the loss of that sense of responsibility for our fellow men and women upon which all civil society is founded (25)
